

PRESS RELEASE

***GearBox 18/6 Networked Automatic Mixer Now Shipping!***

**Fort Wayne, IN, January 18, 2012** - After a longer wait that any of us would have liked, the GearBox 18/6 Networked Automatic Mixer is now shipping! The GearBox 18/6 makes it possible to bring the benefits of a networked AV system, like simpler and lower cost wiring, easy incremental expandability, and infinite routability to small and medium venues. With a built-in 8-port PoE Ethernet switch, DSP audio processing, a full matrix mixer, and the best automixing algorithm around, the GearBox 18/6 is the only box you'll need in the rack for a wide variety of installations. The RC-4 Room Combining Remote and RV-1 Remote Volume Control allow easy user adjustment of the system for any application.

The GearBox 18/6 CobraNet Networked Automixer is a highly integrated 18 input, 6 output digital automixer with DSP. The GearBox includes a fully managed 8-port PoE enabled Fast Ethernet switch with a Gigabit Ethernet expansion port. The GearBox accepts up to 16 networked digital inputs from any CobraNet input source (e.g. Attero Tech InBox units), and has 2 legacy mic/ line analog inputs. Two legacy analog outputs complement 4 networked digital outputs, with a full 18x6 matrix mixer between inputs and outputs. In-room remote control is provided by the RV-1 Remote Volume Control and the RC-4 Room Combining Controller. Both the RV-1 and RC-4 are single gang Decora style wall plate controls powered by the GearBox.

**About Attero Tech** - Located in Fort Wayne, Indiana, Attero Tech is a leading provider of CobraNet® audio interfaces. These products make it easy and cost effective to integrate a wide variety of audio components such as consumer electronics, microphones, paging speakers, computers, and recording devices into a networked audio system. Attero Tech solutions help AV systems integrators reduce cost, improve audio quality, future proof systems, and meet their most unique design requirements. Leveraging their deep background in CobraNet and audio theory, Attero Tech engineers have developed out-of-the-box solutions for virtually any CobraNet connection scenario. If there is a need, Attero Tech has the solution.

**About Mainline Marketing** - Founded in 1987 and based in Melbourne Florida, Mainline Marketing is an award-winning independent manufacturers' representation firm that manages sales, marketing and distribution for companies that produce professional audio and video equipment. Our main customer base consists of consultants, commercial audio visual integrators, broadcast and professional audio suppliers, music industry retailers and production / rental companies.
