Product

330LX Dual-Channel UHF Body-Pack/Plug-in System
Dual Channel ENG Wireless System

Product Brief Description

The 330 Series is a high quality dual-channel UHF camera-mount wireless system that features 188 User-Selectable frequencies displayed on an LCD screen to assure you of finding an open RF channel. The system is unique in that a single receiver can accept two separate channels of audio. The 330UPR receiver features main and headphone monitor outputs, and a removable shoe-mount adapter.

Transmitters and receiver operate on 2 standard "AA" alkaline batteries (not included). The 330LH System comes with the 330UPR dual-channel On-Camera receiver, the 35BT Belt-Pack transmitter, the 35HT handheld microphone/transmitter and the 35XT Plug-In transmitter, cables and a carry case.

Features

Benefits

<ul style="list-style-type: none">Discrete 2-channel Camera-mount UHF Receiver	<ul style="list-style-type: none">Receive 2 audio feeds in a single receiver
