## Product

RED-1

Ethernet Remote Control for Audia® and Nexia®

## Product Brief Description

The RED-1 remote control adjusts or initiates 32 selectable system volumes and actions over an easy-to-read OLED screen. Capacitive touch control simplifies operation. Control functions are programmed in Audia and Nexia system design software, and can be configured to fit the needs of a particular application.

The RED-1 is a PoE network appliance and does not require a wall box for mounting. The controller housing is made from white PC/ABS materials with a UV additive.

Biamp also offers the VS8, Select8 and Volume8 as well as other options for control of Audia® and Nexia® Systems.

## Features

## Benefits

- |   |   |
|---|---|
