AudioBox USB

Audio Recording Interface with Software

Product Brief Description

The AudioBox USB is a 2-input by 2-output professional recording interface bundled with Studio One Artist Software. The Interface box includes two high quality XLR / 1/4" microphone preamps with 48 Volt phantom-power, two 1/4" balanced main outputs as well as Midi I/O and a 1/4" Headphone output. AudioBox USB uses professional-grade analog to digital converters with a dynamic range of 102dB and 24-bit sample rate. The system is powered via USB connection.

AudioBox USB is bundled with PreSonus Studio One Artist music creation program, and over 4 GB of virtual instruments, plug-ins, loops, and samples. Studio One Artist's extensive effects library includes 20 dynamics processors, reverbs, modulation effects, amp simulators, and more. Studio One Artist also includes third-party resources, including Native Instruments™ Kore™ Player with custom SoundPack (150 instruments), Guitar Rig LE, Toontrack™ EZDrummer Lite, and over 1.4 GB of loops.
