PreSonus

## Product

Firestudio Mobile

Recording Interface with Software

## Product Brief Description

The FireStudio Mobile is a ten-input (8 analog, 2 digital), six-output professional recording system that combines two PreSonus XMAX™ Class A microphone preamplifiers; six line-level, analog input channels; S/PDIF digital input and output; MIDI I/O; and headphone monitoring with separate gain control. You can record a whole band with the FireStudio Mobile.

The FireStudio Mobile is bundled with PreSonus Studio One Artist music creation program, and over 4 GB of virtual instruments, plug-ins, loops, and samples.
