PS-55 Stagefive®

Professional Pedal Board Management System

Product Brief Description

The SKB PS-55 Hardcover professional pedal board is designed to accommodate nearly any possible configuration of pedals. The system is designed for the true professional and features a built-in cable tester and headphone amplifier. The power is filtered, regulated and short circuit protected with a detachable main power cord with a 115/230 VAC power supply for international travel.

The PS-55 incorporates the following power options: (2) 1.3 amp 9VAC jacks for powering pedals from Digitech and Line 6, etc; (2) variable DC jacks to allow any voltage from 4-12 volts (simulate an almost dead battery), (4) standard 9 VDC jacks for Boss, Electro-Harmonix, etc, (1) 18 VDC jack for MXR EVH Flanger, etc. (1) 24 VDC jack for boutique and vintage pedals and (2) 9/12 VDC jacks to accommodate additional boutique and vintage pedals. All DC jacks have polarity switches so center negative or center positive are both accommodated. All DC outputs have a current rating of 100mA each. The PS-55 is covered by the SKB **Million Mile Guaranty** on the case and a five year warranty on the electronics.

Features

Benefits

• Injection Molded	• Strong , rugged and travel worthy
