PS-8, PS-8Pro

Powered Pedal Board

Product Brief Description

The 1SKB-PS-8 Powered Pedal board is injection-molded from eco-friendly rubber modified styrene which provides for a very durable and rigid, yet lightweight platform for guitarist's effect pedals. The 1SKB-PS-8 features eight (8) built-in 9VDC output jacks and an external transformer rated at 500mA of total current. The large 19" x 12" hook and loop surface allows for secure pedal positioning for up to eight (8) standard size pedals. All cables are included for powering the most popular pedals. A heavy-duty ballistic nylon carry bag with exterior zipper pocket and adjustable shoulder strap are also included. The PS-8Pro is identical to the PS-8 but includes the SKB-2316 Soft Carry Case.

Features

Benefits

• Injection Molded	• Very strong , rugged and travel worthy
• Light Weight	• 40% less weight than Boss
• Accommodates new and vintage pedals	• Flexible power options
• Practical stage footprint	• Optimized design for most pedals in smallest space

Applications

- Effects Pedals
