Product
RMA8 Series
8x24 Dual Isolated Mic Splitters

Product Brief Description

The RMA8C, RMA8CPRO, RMA8 and RMA8PRO are 8 input, 24 output (3-way) dual transformer isolated audio splitters. A line level pad on each of the 8 input channels allows connection of either mic or line level audio signals. A key feature is dual individual Ground lift switches on each of the 16 transformer isolated outputs help eliminate ground loops. Additionally, a set of 8 direct (non-isolated) outputs enable a permanent and secure connection to phantom power supplies.

RMA8: Rack-mounted, 8 Input, 3-Way Split, Dual Isolated, Mic Splitter

RMA8C: Rack-mounted, 8 Input, 3-Way Split, Dual Isolated, Mic Splitter. All I/O on rear

RMA8PRO: Rack-mounted, 8 Input, 3-Way Split, Dual Isolated, Jensen Transformers, Mic Splitter

RMA8CPRO: Rack-mounted, 8 Input, 3-Way Split, Dual Isolated, Jensen Transformers, Mic Splitter. All I/O on rear.

Features

Benefits

- | | |
|---|---|
| • Broadcast Quality | • Reliable in professional environments |
| • Line Level Pad Per Channel | • Independent channel control |
| • 2 Ground Lift Toggle Switches per Channel | • One for each isolated output |
| • 4 DB25 Outputs (Tascam Pinout) | • Easy Termination |
| • Additional Phoenix Terminal Output Blocks | • Hardwire option (RMA8PRO only) |

Applications

- Broadcast
- Live Sound
- Signal Splitting

Comparison Matrix
