## Product

TCS Series

Complete Line of Installation Series Loudspeakers

## Product Brief Description

The TCS Loudspeakers series is a comprehensive line of more than 20 different products designed for installation. There is a TCS loudspeaker or combination to suit every specification, size and type of fixed installation. Backed by more than thirty years of innovations, TCS products represent the latest in technical breakthroughs such as Dendritic™ waveguides in most 2-way cabinets or Converging Elliptical Waveguides (CEW™) in smaller cabinets. All TCS products provide for smooth consistent frequency, phase and time response for clear discernable audio coverage.

TCS also offers several digitally self-powered (DP) loudspeakers in several configurations that feature high power class-D amplifier modules utilizing 96 kHz DSP technology for operating efficiently in excess of 90%. All TCS speakers offer safe and practical rigging solutions and custom colors to match any décor. Optional IP54 weather-resistance for outdoor use or in humid climates makes the TCS series perfect for all types of sports, leisure and entertainment facilities.

## Features

## Benefits

- Rotatable Wave Guides
- Double Trapezoidal Shape
- Barrier Strip and Speakon NL4 Connectors
